FOR RESTRICTING IMMIGRATION.

THE REV. MADISON C. PETERS CALLS FOR A HALT IN ORDER TO PROTECT THE AMERICAN LABORER.

"Restriction of Immigration" was the subject of a sermon preached by the Rev. Madison C. Peters, the Bloomingdale Church, Boulevard and West Sixty-eighth-st., last evening, to the United Order American Mechanics, 250 of whom attended

church in a body. Mr. Peters said, in part:

The true test of American citizenship is not the good luck of having been born under the Stars and Stripes, but loyalty and devotion to our Constitution and laws. Thousands upon thousands of our naturalized citizens are useful and honorable men, an acquisition to any country. But I believe that we have reached a period in our history when immigration without limit is not advantageous to the welfare of the country or the immigrant. Compared with the heroic, manly men and women who found this country a wilderness and bequeathed it to us a national heritage, envied of the world, the majority of these late comers possess no claim upon our respect, even though they be our "homevilers."

See what they have done for the interval of the country of the self-trails. See what they have done for the large property of the self-trails. See what they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See that they have done for the large property of the self-trails. See the large done the large property of the large prince of the large property of the self-trails. See the large property of the large prince of the large prince

to us a national heritage, envised of the world, the majority of these late comers possess no claim upon our respect, even though they be our "homerulers."

See what they have done for us in New-York. Shall Americans surrender to professional foreigners, or to mongrels, the government of our country, the making of its laws and the moulding of its customs? It is an undenlable fact that the changed character of our immigration is deteriorating and corrupting our native stock. I am not taking a pessimistic view when I say that if immigration continues for twenty-five years as it has for the last fifteen, we will see many of our best citizens going from the United States and the offal of Europe will take their places. Is it not to be regretted in times like these, when hundreds of thousands in our land are piteously begging for work, that this wholesale immigration is allowed to go on? Adjourn Congress for three years and suspend immigration until the men already in this country have work, and good times will come. Scarcity of hands makes higher wages. I believe in protecting American capital by putting a reasonable tariff on the products of European labor, but I want fair play for the American workman, and the only way to protect the laborer in his wages, his living and his dignity, is by putting a heavy per capita tax on the European laborer. So long as the gates remain as open as they now are, it is the employer and not the laborer that is protected. European labor admitted into the American laborer on a level with the pauper laborers of European. Amender of Congress desires a reelection. Suppose he voies for such a bill, and suppose he has among his constituents a large number of reliains, or Irish, or Hungarians, his opponents will see to it that every one desired a reelection voted against the class of immigration is damaging to our future prosperity, the more intelligent and particle citizens of foreign birth see this necessity more clearly than the average American, who has a surrene indifference to facts a

strong throughout the week. The demand for memittance was chiefly from bankers and possibly the payment of July interest on securities held abroad. Toward the end of the week there was however, something more than a moderate mercantile business. Exports of gold amounted to \$7.750,000, and the market closed firm at \$45%, and \$48% for long and short sterling bills respectively.

RAILROAD EARNINGS.

RAILROAD EARNINGS.

"The Financial Chronicle" computes the nevernings of 147 railroads in April at \$12.624.34 at decrease of \$3.638.272, or 22.37 per cent. According to the same authority the decrease in nevernings in March was 17.22 per cent, in February 16.49 per cent and in January 8.87 per cent. The ratio of decrease in net earnings compared with the previous year is the largest yet reached. The Tribune has printed the gross earnings of fifty-six companies or systems for the second week in June. Of the number four companies return gains of \$36,369, or 9.9 per cent, and fifty-two companies losses of \$1,581,232, or 24.8 per cent. The total number shows a loss of \$1,524,354, or 22.8 per cent. It has printed also the gross earnings of sixty-two companies for the first week in June.

The total number shows a loss of \$1,555,797, or 23.7 per cent.
